

Setting Up MMS & Internet for another Carrier

Process Overview

You will need to create two new Access Points (APN - Access Point names) and two new Connections one for Internet & the other for MMS to use this functionality. The default Telstra APN's pre-programmed in to the handset are; 'Telstra Internet' & 'Telstra MMS'. This procedure outlines how to create an Access Point and Connection, listing the associated fields to enter & how to set.

To Create an 'Access Point':

1. From the '*idle*' screen **PRESS** 'OK' to access the main menu
2. **NAVIGATE** to '*Settings*' & **PRESS** 'OK' to explore
3. **NAVIGATE** to the '*Handset*' tab
4. **SCROLL** to '*Access point settings*' and **PRESS** 'OK' to Select
5. **PRESS** the top left '—' key to '*Add*' a new APN
6. **ENTER** the following information in to the appropriate fields
 - Name
 - APN
 - Authenticate {NONE | PAP | CHAP}
 - Username
 - Password
7. **PRESS** 'OK' to Save
8. **REPEAT** steps 1 to 8 to set up the two required Access Points (1 x Internet, 1 x MMS)

Define Connection Settings

1. From the '*idle*' screen **PRESS** 'OK' to access the main menu
2. **NAVIGATE** to '*Settings*' & **PRESS** 'OK' to explore
3. **NAVIGATE** to the '*Handset*' tab
4. **SCROLL** to '*Connections*' and **PRESS** 'OK' to Select
5. **PRESS** the top left '—' key to '*Add*'
6. **ENTER** the following information in to the appropriate fields
 - Name
 - Homepage
 - Server Address
 - Proxy {On| Off}
 - Proxy Address
 - Proxy Port
 - APN
7. **PRESS** 'OK' to Save
8. **REPEAT** steps 1 to 8 to set up the two Connections required (1 x Internet, 1 x MMS)

To Set the MMS APN:

1. From the '*idle*' screen **PRESS** 'OK' to access the main menu
2. **NAVIGATE** to '*Messages*' & **PRESS** 'OK' to explore
3. **SCROLL** to '*Settings*' and **PRESS** 'OK' to Select
4. **PRESS** 'OK' to Select '*Mul. Msg. Settings*'
5. **SET** the following
 - Retrieval Settings {Automatic| Manual | Manual when roaming}
 - Delivery Mode {After sending | Immediately}
 - Delivery Time {in hours}
 - Time per page {in seconds}
 - Delivery report {No delivery report | Delivery reports}
 - Validity {Maximum | Twelve hours | One day | One week | One month}
 - Anonymous Msg. {Accept | Reject}
 - Connections {Created Connection}
 - PUSH Message. {Accept | Reject}

To Set the Internet APN:

1. From the '*idle*' screen **PRESS** 'OK' to access the main menu
6. **NAVIGATE** to '*Tools*' & **PRESS** 'OK' to explore
2. **SCROLL** to '*Browser*' & **PRESS** 'OK' to explore
3. **SCROLL** to '*Settings*' and **PRESS** 'OK' to Select
4. **PRESS** 'OK' to Select '*Connection Settings*'
5. **SELECT** the Internet connection created previously
6. **PRESS** 'OK' to Activate

NOTE This has not been tested, you may need to alter further settings to get this operational.
