

Setting Up MMS & Internet for another Carrier

Process Overview

You will need to create two new Access Points (APN - Access Point names) and two new Connections one for Internet & the other for MMS to use this functionality. The default Telstra APN's pre-programmed in to the handset are; 'Telstra Internet' & 'Telstra MMS'.

This procedure outlines how to create an Access Point and Connection, listing the associated fields to enter & how to set.

To Create an 'Access Point':

1. From the idle screen, **PRESS** the Menu Key to enter the main menu
2. **TAP** '*Settings*'
3. **SCROLL** right on the top menu bar then **TAP** '*Connection*'
4. **TAP** '*Access Point Settings*'
5. **TAP** '*Add*' a add new Access Point
6. **ENTER** the following information in to the appropriate fields
 - Name
 - Access Point
 - Authentication Type {PAP | CHAP | NONE}
 - Username
 - Password
7. **TAP** '*Back*' to save and return to the previous menu
8. **REPEAT** steps 1 to 8 to set up another Access Point (1 x Internet, 1 x MMS required)

Define Connection Settings

1. From the idle screen, **PRESS** the Menu Key to enter the main menu
2. **TAP** '*Settings*'
3. **SCROLL** right on the top menu bar then **TAP** '*Connection*'
4. **TAP** '*Connection Settings*'
5. **TAP** '*Add*' a add new Connection
6. **ENTER** the following information in to the appropriate fields
 - Name
 - Homepage
 - Server Address
 - Proxy {On| Off}
 - Proxy Address
 - Proxy Port
 - Access Point

7. **TAP** 'Back' to save and return to the previous menu
8. **REPEAT** steps 1 to 8 to set up another Connection (1 x Internet, 1 x MMS required)

To Set the MMS APN:

1. From the idle screen, **TAP** 'Messaging'
2. **SCROLL** then **TAP** 'Settings'
3. **TAP** 'MMS Settings'
4. **SET** the following
 - Retrieval Settings {Immediately| Delay | Manual when roaming}
 - Send Mode {Immediately| Delay }
 - Send Delay {in hours}
 - Slide Time {in seconds}
 - Delivery report {Activate | Deactivated}
 - Expiration Time { Twelve hours | One day | One week | One month | Maximum}
 - Receive Anonymous Message {Accept | Reject}
 - Connections {Access Point Created}
 - Priority {Low | Normal | High}

To Set the Internet APN:

1. From the idle screen, **PRESS** the Menu Key to enter the main menu
2. **TAP** 'Tools'
3. **TAP** ' Browser '
4. **SCROLL** then **TAP** 'Browser Settings'
5. **SCROLL** to 'Settings' and **PRESS** 'OK' to Select
6. **TAP** 'Connections'
7. **TAP** the Internet Connection created previously
8. **TAP** 'OK' to the previous menu

NOTE: This has not been tested, you may need to alter further settings to get this operational.
